Project description:

The Project aims to contribute to the development of a more favourable social entrepreneurship ecosystem in the Eastern Partnership region. This will be done through raising awareness, promotion of social innovation, and relevant exchanges with various policy and decision-making stakeholders that will ultimately lead to an increase in the number of social investors, social entrepreneurs, and collaboration across the region. As a result, civil society organisations and social enterprises will benefit from social investment to become sustainable and have a positive societal impact. Alongside providing financial support to establish venture philanthropy funds in the region, the action will include specific components for Armenia.

The Armenia component, developed in partnership with the EU Delegation to Armenia, will comprise an Emergency Covid-19 Relief Fund for social enterprises, incubation and acceleration programmes, as well as social innovation competition events aimed at promoting new social business models.
