Project description:

The multicomponent EU4Dialogue Programme supports initiatives fostering an environment of dialogue and people-to-people contacts across the divides in the South Caucasus and the Republic of Moldova. The Programme is committed to reach out to conflict-affected populations by improving the quality of people's daily lives paying special attention to the most vulnerable groups including those displaced. In this way the EU wants to ensure that no populations are left behind and without adequate support.

The "EU4Dialogue: Support to Conflict Transformation in the South Caucasus and the Republic of Moldova" project aims to build a durable foundation for conflict transformation by improving socio-economic conditions and human security for conflict-affected communities.

Expected results:

- A sub-granting scheme for small scale local initiatives in support of confidence building measures across the divides, reaching out to both women and men.
- Capacity development support to empower grassroots actors.
- Facilitation of contacts across dividing lines to find solutions to shared living-standard challenges.
- Identification and implementation of strategic conflict transformation interventions through works and supplies.
