Project description:
The Action Overall Objective: To contribute to the care and integration of the vulnerable recently displaced population from Nagorno-Karabakh in the communities in Armenia
Specific Objective: To provide meaningful access to specialized care and integration activities for elderly people displaced from Nagorno-Karabakh and locals living in the Syunik region in Armenia.
Main activities - 1) Renovation of Senior Center; 2) Provision of equipment and furniture; 3) Weekly activities (cooking, crafting, and social inclusion events)
Final beneficiaries - Men and women aged 68 and older living in Goris, Syunik region.
The action will target 100 displaced and local men and women aged 68 and older living in the Goris enlarged community
The proposed elderly space will be able to function as a platform where elderly can receive the primary health care by a nurse and can be referred to specialized services (i.e. state-run services, CSO-run services, assistive devices, and specialized (mental) health care) when identified as needed. Necessary equipment will be acquired to facilitate the training courses, to equip the workshops and to facilitate the participation of elderly men and women when joining the activities (i.e. wheelchair, seat, walking stick).

Expected results:
1. Elderly men and women from NK and local have improved access and movement to and within the elderly care center, including to WASH facilities, through partial renovation work.
2. Elderly men and women from NK have improved access to elderly care services and integration activities through the provision of recreational activities, employment opportunities, basic medical care and referral pathways to existing state- or CSO-run services in target areas.
