Project description:

The project is aimed at launching PPP dialogue in Armenia's Ijevan city aimed at establishment of a sustainable ecosystem for development of innovative entrepreneurship in the domain of tourism, high value agriculture and food processing.

Expected results:

Operational ecosystem comprised of business accelerator and Armath engineering laboratories functioning in the Ijevan (serving as community development hubs) promotes innovative entrepreneurship;

Advanced educational opportunities via establishment of Real School for vocational education and work-based learning

Advanced training program for women, youth and other representatives of vulnerable strata of population through training, retraining, work-based learning and nurturing of hard and soft skills
